Warranty	Two years parts and labour

ACCESSORIES INCLUDED

- 1 x Temperature probe
- 1 x Probe clip
- 1 x Accessories case

PRODUCT HIGHLIGHTS

TOUCH CONTROLS

For precise cooking control, the zones are operated by an ergonomic slide control where you can choose to touch directly or finger swipe up and down the 1 to 9 power levels with no 'tapping' required.

EXTERNAL PROBE

An external probe is included with the hob, allowing users to monitor the core temperature of their food. This feature enables precise cooking by either automatically stopping cooking once a target temperature is reached (Probe Target mode) or maintaining the desired temperature for a specific time (Probe Timer mode).

PRESET MODES

The PIC01 offers convenient preset modes for common cooking tasks such as Keep Warm, Fry, and Barbecue programs. These modes can be further customized with three power levels, catering to different types and quantities of food.

PORTABLE DESIGN

The PIC01 is designed to be easily transportable, making it convenient for use in the kitchen or in a holiday home.
