Warranty	Two years parts and labour

ACCESSORIES INCLUDED

1 x Portafilter support

1 x Aluminium dosing funnel

1 x 130g ground coffee containers

PRODUCT HIGHLIGHTS

50 MICRO GRINDING STEPS

The CGF03 offers a customisable grinding experience with 50 precise steps divided into three segments: superfine, fine, and medium. This allows users to tailor the grind size to their specific brewing method, whether it be for non-pressurised baskets, pressurised espresso baskets, or other coffee preparations, ensuring optimal extraction.

240G CAPACITY

The generous 240g capacity of the grinder allows for ample storage of the freshest coffee beans. The sealed lid helps maintain the freshness of the beans by protecting them from exposure to air, moisture, and light, ensuring that each grind delivers rich and flavorful coffee.

STAINLESS STEEL CONICAL BURR GRINDER

The CGF03 is equipped with robust stainless steel conical burrs that ensure longevity and consistent performance. The removable grinding system facilitates easy cleaning and maintenance, making it simple to keep the grinder in top condition, ensuring optimal grind quality every time.

NOTE:All plastic material that comes into contact with food or water is BPA free
