PRODUCT HIGHLIGHTS

30 GRINDING LEVELS FOR CUSTOMISATION

Engineered to deliver the perfect coffee, Smeg's conical burr grinder transfers less heat to coffee beans and can produce finer grinds as well, preserving the flavour and aroma required to create the perfect cup.

ANTI-STATIC SYSTEM

The anti-static system ensures even distribution of coffee in the chamber and guarantees a simple clean at the end of each use with the accompanying brush.

350G CAPACITY

The generous 350g capacity of the grinder allows for ample storage of the freshest coffee beans. Start the day in style or entertain guests with a fragrant coffee ready in minutes.

FINE, MEDIUM AND COARSE GRINDING

However you like your cup - from a coarse grind for cold brewing through to a fine grind for the perfect espresso, the coffee grinder will achieve the perfect balance.
