| Warranty          | Five years parts and labour                                                       |

### 38 BOTTLE CAPACITY

Storage of up to 38 Bordeaux (750ml) bottles. Perfectly shaped housings provide ample storage for different shaped bottles. Champagne and magnums can be stored horizontally without risk of sliding.

### UV RESISTANT GLASS

Solar light and UV rays can alter a wine's structure, ruining its balance and flattening its scent. Layered glass panels in Smeg's built-in wine cellars protect wine from damaging light whilst providing maximum transparency.

### VIBRATION PROTECTION

Smeg wine cellars are equipped with an ultra-quiet cooling system which keeps vibrations down to a minimum. Even the smallest vibrations can affect wine by lifting sediments. This causes different components to mix, altering the balance developed during the ageing period.

### SLIDING OAK RACKS

Telescopic sliding oak shelves allow for easy placement, storage and removal. The smooth movement prevents disturbance of wine sediment. Made in Italy, these racks are crafted from the same oak as traditional wine barrels.

## CVI138RG

BUILT-UNDER LINEA WINE CELLAR  
RIGHT-HAND HINGE

MADE IN ITALY

Since 1948

**MATCHES WELL WITH:**

CPS115G

LINEA SOMMELIER DRAWER:

- Slavonia durmast wooden shelf
- Wine pump
- 2 corks
- Sparkling wines cork
- Cork to pour wine
- Anti-drip cork
- Solid steel cork for sparkling wines
- Champagne/ sparkling wine pliers
- Corkscrew sommelier
- Red wines cork
- Wine thermometer with slipcase
